

### Message from the Desk of MD

I am very glad to know that a quarterly publication "BARTA" is going to publish jointly by PNL Holdings Ltd. & Pedrollo nk Limited. I welcome this initiative and hope that this publication will continue through which everyone will have the opportunity to know the services, progress, new products, activities & news of the company. My deep gratitude to our clients, friends, well-wishers, who have been supporting us diligently to establish Pedrollo throughout the country as the best water pump brand and won everyone's trust. I hope, we will be able to maintain our reputation & trust forever with our quality products and services. My cordial thanks to all the employees who are contributing to the success of the company by their sincere effort, hard work and dedication. I wish all the success of this publication.

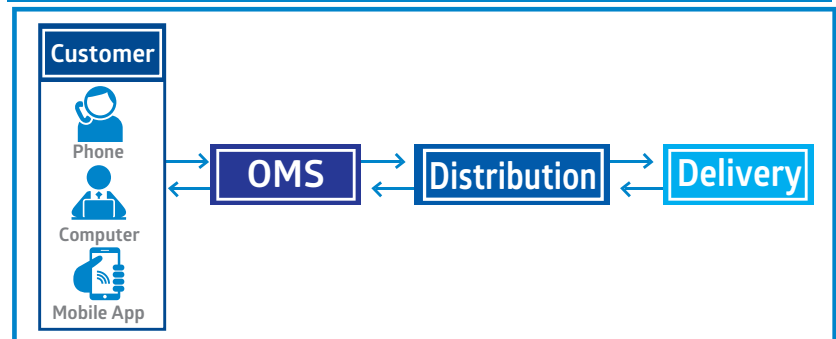

**Nader Khan**  
Managing Director

### Pedrollo NK Limited is now ISO Certified

Pedrollo Nk Ltd. has been given the ISO 9001 Certification in the month of September, 2016 for maintaining the Quality Management System for water pump sales & servicing. This certificate is a recognition for international standard which is given to those companies, who follows quality management principles including strong customer focus with quality product, the motivation and implication of the top management using the process approach and improvement of growth in continual basis.

### Introducing Order Management System (OMS)

PNL Holdings Ltd. has launched the Order Management System (OMS) for customers to buy products easily. It is a system through which customer can order any products of PNL Holdings Ltd. from any place at any time by computer or mobile. Customer will receive order related information along with tentative date of product delivery by SMS. The software is only available for the Pedrollo sales representative. We have the plan to open the system for all according to customer demand.

### Tips to Operate Water Pump During Summer

- ◆ Operate the pump when the voltage is stable
- ◆ Avoid to operate the pump at peak times ( 5 AM – 11 PM )
- ◆ Use Overload-relay and Phase-failure relay for product longevity & prevent the pump from burning

## Software for Accurate Water Pump Selection

### Water Pump Selection

**Customer Details / Optional**

Name of Customer	Contact Number
Customer Address	Customer Email

Choosing the right water pump is very important for maximum performance & longevity. The exact pump can give ensurity to lift the water in less time with low electrical efficiency & reduce maintenance trouble. Some unscrupulous people often confused the customer by providing false information for large profit. PNL Holdings Ltd. has developed a software for customer to reduce confusion on pump selection. Now customer can select the appropriate pump of his own providing specific data through online. The software will soon be open to the public.

## Benefits of the Control Box

Control box is used to protect the motor of the pump for longevity. The control Box should be used to protect the motor during electrical instability. Our control box has some special features like wrong rotation, phase drop including wrong connection which will prevent the motor from short circuit, overload and dry running. Otherwise, the motor may burn.

## Is the water tank of your home / office / factory safe?

If you do not clean the water tank regularly, your tank will be infected by bacteria, germs, which are very harmful to the body. To stay healthy, the water tank should be cleaned & sterilized regularly.

PNL Holdings Ltd has been launched "PNL Service Care" with latest machinery & skilled labor followed by internationally recognized 5 critical steps. Our aim is to clean & sterilized overhead tank & reserve tank efficiently of your office, industry and market.

For cleaning tank, pump failure, proper water transmission and motion control, with the option to use alternative generators, PNL Service Care is available from 9 AM – 9 PM for service. For all your questions about the service / information please contact at 16308. PNL Service Care is committed to supply water uninterruptedly.
